„SAME DAY“-shipping

*starting from 1,90€!*

B to B and B to C • also small mail order  
companies

National & international

- *Reduce costs -save space* •

## Goods Receipt

Your goods arrive by truck or parcel service. We have the products as soon as we receive the goods, depending on the requirements, randomly or individually for completeness and means of transport.

## Storage

The goods are immediately stored and posted in inventory management. From now on their wares available for sale. We always pay attention to one when storing optimal utilization of your storage space.

Sufficient storage space is available in heated warehouses for this purpose. Regardless of whether pallet storage, shelf storage or bulk storage is required. Of course, alarm and fire protection secured.

## Peck

We pick depending on the requirements, but always product-oriented with time and route optimization. This avoids unnecessary journeys and the goods reach the packing stations as quickly as possible. All orders that reach us by 2 p.m. are dispatched on the same day.

## Picking & packing

All orders are packed securely for transport at the packing stations and delivery notes and invoices are enclosed. There is always a double content check before closure.

## Shipping

We work with many freight and shipping service providers so that the best price is always achieved depending on the product and destination. We dispatch all consignments. From the smallest consignment of goods / letters to parcel and pallet shipping to container loading.

## Returns

We handle returns processing on a daily basis, always in accordance with the requirements for the item. From re-storage to recycling or even destruction.

***Print service suitable for shipping!***

## Print service is also part of fulfillment

Our fulfillment begins with the acceptance of your delivery note and billing data. We print all the necessary papers and inserts and take care of warehousing, picking, packaging and shipping ... simply everything!

- **Logistics concept**

After a detailed analysis of the existing structures and a careful profitability calculation, we will work with you to create a specially tailored logistics concept that also covers all conceivable promotions (seasonal peaks / special promotions) at any time.

- **Shipment tracking**

With us you always receive the growing shipment status. Regardless of whether your package was on the plane, at customs or at the neighbor's - they know where it is!

- **Permanent cost analysis**

We are not resting on a one-off concept, everyone is working and optimizing.

Our goal: The optimal contact logistics solution that optimally belongs to your processes.

- **Reporting**

A transparent process chain with new reporting guarantees control over the new status of your orders.

- **Permanent quality assurance**

Permanent quality assurance is a decision for our service level in all processes. Especially with our outgoing goods representatives and every outgoing consignment on the integrity, correct and personal content, also on the transport security of the packaging.

We work on the four-eyes principle. The final control check of the responsible employees by means of an enclosed control slip.

## Who we are

We are a reliable team with over 21 years of experience in warehouse and shipping logistics.

## What we do

We provide storage space and take care of the dispatch with all associated requirements. Invoice and delivery note printing too, of course.

## Why we are better

We constantly analyze and optimize our processes. As a result, we always offer the most reliable and best service. Our IT supports all common interfaces. No programming work is required.

## How we can be successful together

You are more successful with reliable, fast and punctual shipping. That is what makes our success.
